

# VIRTUAL SCHOOL PARTNERSHIPS

## A digital solution for school partnerships.

The Virtual School Partnerships programme is an all-in-one solution for schools to establish meaningful partnerships online. We provide the platform and dedicated group space to manage all school-to-school communications, projects, partner school meetings (Zoom integration), pedagogy exchanges and more!

With a network of schools and government links in over 100 countries worldwide, schools can apply for a partner school anywhere in the world. We will match you based on your school profile, vision and aims for the partnership.

This inclusive programme is accessible to the whole school, but we recommend assigning a group leader (typically the international coordinator) to co-ordinate with the partner school. For 12 months you will be assigned a School Account Manager who will support with all group calls, communications and enquiries. If required, this service can be renewed annually.

Global  
School Alliance
